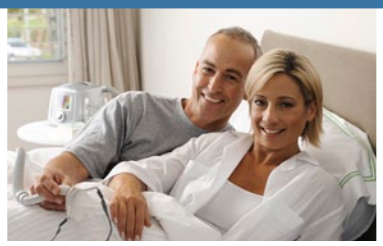
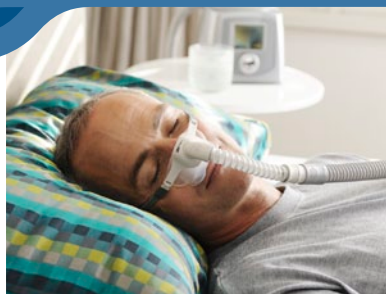
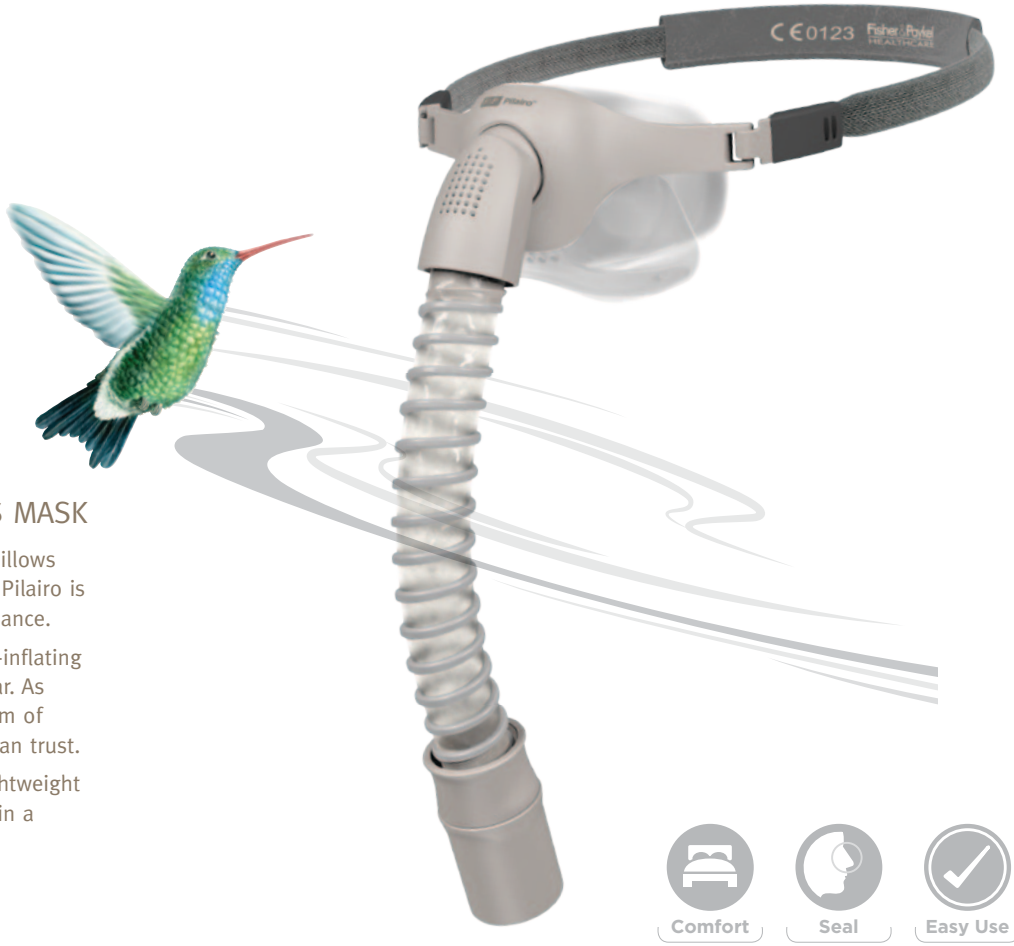
Nasal Pillows Mask

F&P Pilairo™

Sleep freely on pillows of air







F&P PILAIRO NASAL PILLOWS MASK

Weighing in as the lightest F&P nasal pillows mask (1.83 ounces/52 grams), the F&P Pilairo is light on the patient and big on performance.

The clever design integrates a new self-inflating AirPillow™ Seal and minimalist headgear. As a result, the patient experiences freedom of movement coupled with stability they can trust.

The revolutionary AirPillow Seal and lightweight comfort of the F&P Pilairo truly puts it in a league of its own.

Comfort | Seal | Easy Use

Fisher & Paykel HEALTHCARE

Every detail of the F&P Pilairo has been carefully researched, developed and engineered to improve patient SleepLife*. The F&P Pilairo represents minimalist, highly effective nasal pillows design at its best and sets new benchmarks for comfort, seal and easy use.

Feel the new AirPillow Seal.

- The micro-fine contoured silicone used in the F&P Pilairo's AirPillow Seal is (0.04 inches/0.12 mm) at its thinnest point and only (0.12 inches/3.0 mm) at its thickest.
- Soft, comfortable and highly effective, this fine seal is ergonomically designed to self-inflate with (Continuous Positive Airway Pressure) CPAP flow, to gently envelop the nose.

Experience total comfort on pillows of air.

- The F&P Pilairo makes the need for complicated adjustments and complex headgear redundant.
- Its minimalist design is stable, low profile and unobtrusive.
- No more messy straps, adjustments or facial indents.

Experience easier therapy.

- One convenient size.
- Only three simple parts to clean.
- Quick and easy to fit.

A little bird told us to make it light, small, fast and clever.

The design of the F&P Pilairo was inspired by the aerodynamic flight of the world's lightest little bird – the hummingbird. The hummingbird can rotate its fine wings in a circle; it is the only bird able to fly forwards, backwards, up, down and sideways and can hover in midair. This drove the design of a mask seal which self-inflates around the nares in a 'hover-like way' while providing total freedom of movement.

* We sleep for a third of our lives. During sleep we grow, we repair, memories are made; our bodies and minds are rejuvenated. Sleep feeds our quality of life.

This is our lightest mask, the F&P Pilairo weighing in at 1.83 ounces/ 52 grams.

1. AirPillow Seal

- The AirPillow Seal is 3D contoured with fine Variable Thickness Silicone (VTS™).
- It uses CPAP pressure to self-inflate to create an effective yet gentle seal into and around the nose. The AirPillow Seal can move and flex in any direction without compromising the seal.

2. Stabilizers

- The stabilizers provide the support frame for the AirPillow Seal and assist with stability.

3. Stretchwise™ Headgear

- Made from a soft latex-free elasticized thread with intelligent-stretch properties, the headgear automatically customizes to the wearer.
- No manual adjustments are necessary.
- One convenient size.

4. Flexible Tube

- The delivery tube is lightweight, very flexible and designed to minimize pressure or pull on the face.
- The Ball and Socket Elbow provides greater flexibility for tube positioning.

5. Quiet Air Diffuser

- Efficiently designed to ensure the flow is directed away from the patient and their bed partner for a quiet sleep.

FITTING THE F&P PILAIRO IS EASY. FOLLOW THE SIMPLE SEQUENCE BELOW FOR BEST RESULTS:

1. Spread the Wings

Use your fingers to pull apart the pillows.

→

2. Position the Mask

Place the pillows on your nose until you feel a comfortable seal.

→

3. Locate Headgear

Pull on the auto-adjusting, one-size stretchwise headgear.

→

4. Test the Wings

Give the wings (pillows) a little wiggle for comfort.

→

5. Turn on CPAP device

The F&P Pilairo's AirPillow Seal will self-inflate and seemingly hover in and around your nose.
