When he woke up this morning, something was different ...

AirFit™ P10
Nasal Pillows System

Many patients are frustrated by a mask that's either too noisy, heavy or bulky.

And what's the point of sleep apnea therapy if the mask that's supposed to help, only makes things worse?

With this in mind, ResMed has created a quiet, lightweight and easy to fit mask ... the AirFit P10.

Dual-wall technology
with trampoline action seals on contact, dispersing air gently to the nose.

Key-clip nasal pillows
offer effortless assembly, with colour coding for easy sizing and left/right orientation to ensure you fit the mask properly.

The innovative flexi-tube
is ultra-light and flexible, yet highly durable, offering you freedom of movement without compromising seal.

QuietAir woven-mesh venting
gently directs expelled air, so it's barely noticeable to you and your bed partner. **This is ResMed's quietest mask yet!**

QuickFit elastic headgear
with unique split-strap design provides stability and adjustability with minimal facial contact.

The AirFit P10 for Her
is designed especially for women, offering a smaller size for female facial contours, along with stylish tones and highlights.

When it's time for bed ...

AirFit P10 is so easy to set-up. It comes in just three parts and the QuickFit™ elastic headgear means that it can usually be fitted in under 30 seconds.¹ The slim, adjustable headgear straps are designed to provide a comfortable fit, plus it's really light² and doesn't interrupt the line of sight. So if you want to read or watch TV before bed, you can.

Once you've brushed your teeth, checked the oven is off and climbed into bed, you just put it on, and you're done.

You settle down ...

It doesn't take long to get comfortable either. The trampoline action in the pillows and the mask's flexi-tube make it easy to move around without dislodging or pulling them out.

And as you lie in the dark with your eyes closed, the mask is barely audible³ thanks to its ingenious QuietAir™ woven-mesh venting. This advanced vent directs air away from you and your partner, so that neither has to hide away on the other side of the bed.

And before you know it ...

The alarm sounds and it's time to get up. But the difference is you'll be more likely to want to get up and into the day. Because if you sleep well, there's more time to be the person you want to be.

AirFit P10 is the right fit for you
